DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over, U.S Patent No. 4623330 to Laby et al and further in view of U.S Patent No.. 5505707 to Manzie et al.

Laby teaches gas diffusion-limited controlled release devices. Laby teaches a medication delivery system comprising of an infusion pump, fluid storage chamber a displacement piston, an elastic member, a pump outlet. Laby however, is does not teach a bolus injector system or a drip chamber. Laby discloses a tubing system with pump for delivering continues fluid flow or fluid bolus to a surgical site, which consists of a drip chamber and a bolus injector (Fig 2)

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have combined these systems, because according to Manzie this system will eliminate the inconvenience or awkwardness for the physician to adjust the clamp to control the fluid flow while also handling the surgical instrument. (Col.1, lines 45-50), furthermore a drip chamber will allow the caregiver an extra check point hence more control over the introduction of fluid into the patient, and as it is well

Art Unit: 3763

known control over fluid intake of a patient is crucial and if its not well controlled it may have devastating outcomes.

Allowable Subject Matter

2. Claims 3-5, 7-17, 25-34, 38 are allowed.

Response to Arguments

3. Applicant's arguments filed 10-2-2003 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., outlet tube positioned in the lower portion of the chamber) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3763

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
